

JAMES BAIERSKI

Escondido, CA

SUMMARY

Data and automation professional with 2 years supporting law firm operations through database administration, pipeline development, and reporting. Builds Python and SQL automation that removes manual work from legal and back-office processes, and delivers self-serve reporting for non-technical stakeholders.

TECHNICAL SKILLS

Languages & Analysis Python, SQL, Excel, Power BI

Data Engineering ETL pipeline design, Apache Airflow, Snowflake, database design, query optimization

Automation & AI Workflow automation, automated report and document generation, RAG applications, MCP server development, multi-agent systems

EXPERIENCE

Data Analyst | Frantz Law Group Mar 2026 – Jun 2026

- Delivered data processing and reporting for legal and operational teams, fielding ad-hoc stakeholder requests and converting the recurring ones into repeatable automated outputs.
- Implemented data governance processes that improved data quality, consistency, and firm-wide accessibility.

Python Developer & Database Administrator | Reese Law Group Aug 2024 – Mar 2026

- Replaced a manual legal document process producing roughly 50 documents per week with an automated generation workflow that produces hundreds per minute.
- Designed and deployed end-to-end data pipelines integrating internal systems into a unified reporting layer used by firm staff.
- Developed no-code reporting applications giving admin and compliance staff direct access to firm data without engineering support.
- Refactored and optimized business-critical Python automation scripts firm-wide, improving reliability and maintainability.
- Administered internal databases and authored custom SQL for client and stakeholder reporting across departments.
- Served as technical support for attorneys and administrative staff, resolving system and application issues.

SELECTED PROJECTS

- **AI-Powered Legal Knowledge Assistant** — RAG application in Python using vector search to retrieve and summarize legal information from firm documents.
- **Automated Reporting Platform** — Internal reporting solution integrating SQL databases with scheduled data pipelines for business stakeholders.

EDUCATION

B.S. Mathematics | California State University, Northridge 2019 – 2022

Transfer Coursework | Palomar College 2015 – 2018
